

What you need is time and patience!

Read the user manual first!

1) Install the gauges folder to gauges fsx

2) Install the effects to effects

3) Change manual settings in the instrument devices by fsx instruments manual keelocks and joystick to window 1 = A, window 2 = B; window 4 = C; and so on up to I!

4) If you using coolihead on joystick, be careful by using cause the sight of the window changes the eye horizont to left, right, up an down! Y'll get troubles by fling the new fsx planes!

So have a nice flight and enjoy!
